Summary

Full-Stack Web Developer with experience in collaborating on web applications. Teamwork, communication, and leadership have become my strong suits from 5+ years of part-time work. I have earned a full-stack web developer certification, and gained an immense amount of knowledge during and after my studies.

Technical Skills

Languages: HTML, CSS, JavaScript, Java

Web Technologies: Node.js, Git, Heroku

Databases: MySQL, NoSQL, MongoDB

Libraries: React.js, Express.js, Material-UI, Bulma, Bootstrap, jQuery, Handlebars.js

Projects

RGMarket | <https://tinyurl.com/RetroGameMarket> | HTML, CSS, JS, Bulma, Handlebars, node.js, express, MySQL, and Insomnia.

A Marketplace for users to purchase and sell their old and new video games.

- Styled and designed pages for the application to create a better experience for the users.
- Challenged to learn how to use Handlebars, Bulma, and Insomnia in one week.
- Implemented good naming conventions and comments to communicate with the backend devs.

VodU | <https://vodu2.herokuapp.com/> | HTML, CSS, JS, React.js, Material UI, Express.js, MongoDB, and Node.js

An app for people to upload personal gaming clips for others to critique or make comments on.

- Styled and designed pages for the application to create a better experience for the users.
- Implemented reusable components to follow best practices to react application framework.
- Created a prototype for an upvoting system.
